Technical Assistance

Mark Zimmermann has 30 years experience in running a full time taxidermy studio. He would be glad to draw on his experience to answer any questions you may have. We are always updating ourselves to current modern techniques, so feel free to call us at: 403-291-0162

NEW LOCATION

Hello Again,

Another year has passed and we are pleased to bring you our 11th catalogue.

We have worked extremely hard this past year to bring you a greatly expanded line of supplies. As we have expanded we are pleased to bring you new paints, chemicals, jaws, ear liners, eyes, habitat supplies as well as introduced the Silver Willow and Alpine line of deer forms.

The Zimmermann's promise all new products purchased and sculpted, will meet the needs of the millennium and the discriminating taxidermist.

We would like to thank you for your past support and look forward to your calls.

Many thanks from the Zimmermann's.

To the Taxidermist

Select Taxidermy Products introduces the “Alpine and Silver Willow Series” to the discriminating taxidermist.

This new line was designed to compete with the best of the best.

We also have our Website: **www.selecttaxidermy.com** In this website click on new products as we will be continually updating our web page with our new products and new molds.

Attention Canadian Taxidermists

Hello everyone,

Please help support the Canadian taxidermy industry by supporting Canada's taxidermy suppliers. Select Taxidermy Products Ltd will continue to expand our product line of manikins and supplies.

Canada's taxidermy supply shops continue to decrease, we can only survive through your continued support.

Thanks for your attention to this matter.

Best regards in your business ventures.

How to Paint Flehmen Mouthpiece Assembly by Joe Meder

Steps

1. Wash all parts with thinner to clean any molding residue or dirt (Photo 1)
2. Spray the entire palette, lower jaw, and tongue with flesh tone. Feather out the flesh tone towards the front of the palette. (Photo 2)
3. Spray black at a low or flat angle to achieve the desired gray detail of the papillae and palette. (Photo 3)
4. Lightly spray a thin wash of gill red on the palette and lower jaw to brighten.
5. Same steps can be used for the tongue, except a deeper color of red is necessary. Check your references for palette and tongue colors.
6. The septum should be sprayed with flesh only.
7. Using Burnt umber oil paint, coat the teeth with paint and wipe off until the desired staining effect is achieved.
8. Coat all parts with clear gloss and assemble. (Photo 4)

Paints:
Airbrush: Flesh tone, Black, Gill Red
Oil: Burnt UMBER

McKenzie's Joe Meder Deer Eye with Liquid Lens™ Technology

We are excited to introduce a complete new design in deer eyes by Joe Meder with a revolutionary new patent pending breakthrough effect called Liquid Lens™ Technology. To create this new eye Joe went back to the basics and began by casting eyes and lenses from fresh deer. He then took those casts to his pen of live deer to compare. Once the prototype was complete it was time to begin testing colors. Roger Martin from McKenzie and Teresa Fonder from Van Dyke's were brought in to help develop the special effect Joe was looking for. Glass eyes have always had a certain "flat" or lack of 3-D effect when it comes to the depth that can be achieved with painting. Joe was very specific in that he wanted to create the effect of how a live eye captures and reflects light. With this request Roger has invented what may prove to be one of the biggest advances in glass eye technology in years. Through a series of mold designs and painting techniques he and Teresa have achieved for the first time in taxidermy, a truly "liquid" look in the lens.

New patent pending
Liquid Lens™ Technology
captures and reflects light to
create a live 3-D effect.

**More Sizes
Available!**

Note: The Meder eyes
now have a notch in
the base to indicate
the front of the eye.

Back View

This NEW lens shape by
Joe Meder is cast from a real
deer and allows the eye lid to
lay accurately on the glass.

Front View

The brown in the limbus band
has been extended in the front to
allow for easy setting in any deer
form.

"This new 'liquid crystal eye' is the most advanced, most accurate and exciting eye I've ever seen. No effort or resource was spared in the research and development of this eye. As you can see, the clarity and depth of the iris is unrivaled; it looks alive!"

Joe Meder

"At last, I can now get the shape, color and depth that I've always wanted, but could not attain in traditional glass eyes. The new Joe Meder Liquid Lens eye is by far the best deer eye I have ever used."

Dennis Behn

Joe Meder has raised whitetail deer for over 30 years at his facility. Through his lifetime of study and experience he is one of the acknowledged experts in whitetail deer anatomy and taxidermy.

SHED MOUNTING PROCEDURE

1. Cover manikin with felt or desired material and staple edges to the back of manikin.
2. Drill a 1/4" hole through the center of each antler pedicle completely through the plywood base at the approximate angle the antler is to be positioned.
3. Mix bondo (or 5 Min epoxy) and coat half of mounting rod and fill hole in manikin. Insert rod until flush with the back of manikins plywood base. Allow to dry
4. Center manikin on plaque and fasten together with four 2" wood screws through the back of the plaque and into the manikin.
5. Drill a 1/4" hole about 2-1/2" deep into the center of each antler base.
6. Position each antler on the respective mounting bolt. Grasp firmly and bend rods until proper alignment is achieved.
7. Remove antlers. Mix Bondo or five minute epoxy and coat both mounting rods and the holes in the base of the antlers.
8. Install antlers and secure with tape or hold in the correct position until dry. (Cut Braid trim to the appropriate length and hot glue into place around antler base.

Designed and manufactured in America.

Typical Applications

A: White Tail Deer
B: Mule Deer
C: Raccoon

D: Buffalo
E: Wild Boar

The Whizard Fleshing Machine is far more accurate and much faster than fleshing with a knife. It is a lot safer and faster than fleshing with a wheel. Relative to tanning, the skin rehydrates very well because of the extra clean fleshing. The skin pickles faster and more thoroughly, making shaving faster and thinner. The skin accepts tanning agents evenly with less time allowing for greater stretch.
